Dr. Robert Young and Matthew Hazen | There’s graphene oxide in all of us now. | **How to get it out**

Dylan Eleven • Truth11.com

Dr Robert Young's understanding of what we are facing with wireless radiation and toxicity due to metals and graphene oxide in the vaccines, our food/water supply, and in the air; is the most accurate and insightful I have found.

We are not fighting "viruses", our threat is chemical and radiation poisoning and this is his recommendation and potential solution for us all, un-vaccinated and the vaccinated.

> **"This could be an antidote to chemical and radiation poisoning" Dr. Robert Young**

Of the many doctors I have researched, he is tied for first place. I give great weight to his understanding and potential solution.
